

I am writing to voice my concern that The National Association of Broadcasters are trying to take away my choice as a consumer of Satellite radio of what I am permitted to hear (similar to what the FCC is doing with their censorship). I am in the Wasington DC area and spend commuting time stuck in traffic and Satellite Radio has made this a lot easier, especially the XM Instant Traffic & Weather reports. I urge you to reject the NAB's petition 04-160.
